MEASURING INSTRUCTIONS:
Always measure over clothing to be worn in the footwear. All measurements are to be taken while seated, by someone other than yourself. Have your leg crossed over your other knee for circumference measurements 1 through 4. For measurements 5, 6 and 7 place feet flat on the floor. Calf circumference is measured around the largest part of the leg and around the top as illustrated.

*For height on riding boots, take measure #7 on the inside of the leg and add 1 ¼” for wrinkling at ankles. Drop may vary depending on lining. On Patrol Boots add ¾”. Foot tracings are to be taken standing with equal weight on both feet. Draw outlines holding the pencil perpendicular.

NOTE: Orders placed at a Dover store will be shipped to that store.

General Measuring Instructions

Indicate right and left foot – measure over socks or hose and breeches. Please have someone help you measure.

Outline both feet and indicate right and left. To outline foot use a slim pen and a draw complete outline of foot. Trace under arch of foot at 45° angle. Trace and label any corns, etc.

Trace each foot as shown on page 13 using a separate piece of paper for each foot. Make sure tracing and measurements include all the information required by each manufacturer. Please be sure to add the dotted lines to your tracing indicating the arch and ball of your feet.

IMPORTANT!
All leg measurements must be taken in sitting position; measure feet while standing. For accurate measurements, always have someone else measure you.

Measured by ________________________________

NOTE: Der-Dau, Vogel and Dehner boots require measurements in inches, Cavallo, Sergio Grasso and Konigs must be measured in centimeters.

Please mark on the foot tracing exactly where heel, instep and joint (ball) measurements were taken.

NOTE: Foot information for semi custom boots will be used to determine standard size foot only.

SEE PAGE 13 FOR FOOT TRACING.

1. TRACING Wearing socks and breeches normally worn, trace the outline of your foot at a 90° angle using a pencil. Then measure from the longer toe line straight to the back of the heel.

   RIGHT __________________________
   LEFT __________________________

2. BALL Measure the ball of the foot from the big toe joint all the way around the little toe joint, straight across without angling the tape.

   RIGHT __________________________
   LEFT __________________________

3. INSTEP Measure from the highest point of the top of the foot all the way around straight across, not at an angle.

   RIGHT __________________________
   LEFT __________________________

4. HEEL The heel measurement is taken diagonally from the bottom of the back of the heel across to the top of the foot.

   RIGHT __________________________
   LEFT __________________________

5. ANKLE Measure around the ankle bone. (usually 4-6” from the floor).

   RIGHT __________________________
   LEFT __________________________

6. CALF The calf measurement is taken at the widest part of the calf. It can be found by sliding the measuring tape up and down until finding the widest point.

   RIGHT __________________________
   LEFT __________________________

7. TOP The top is measured at the highest point (to the crease of the knee) and make a pencil mark on outside of the leg on top of the tape.

   RIGHT __________________________
   LEFT __________________________

8. HEIGHT The height is measured from the pencil mark, to the floor, on the outside of the leg, then add 1½” for your total height measurement (that is to allow for breakage and wrinkling).

**FITTING INSTRUCTIONS**
This vest requires measurements of the chest, waist and spine. Remember, the vest is designed to fit snugly. Reference the size chart to select the most appropriate size for your measurements. If your measurements fall between sizes, the best fit is usually the smaller size.

- **Chest** - Measure at the widest point, to a snug fit. See diagram A.
- **Waist** - Measure at the natural waist. See diagram A.
- **Spine** - Measure from the small bump at the back of the neck down to the tailbone, following the contours of the spine. There should be about 1½" to 2" clearance from the saddle or chair to avoid interference with the saddle while riding. See diagrams B and C.

**Chest measurement**

**Waist measurement**

**Spine measurement**

**IMPORTANT:** Due to the snug fit of this vest it is recommended that the side laces be loosened before pulling up the zipper. Doing this ensures the zipper is inserted correctly and prolongs its life. Follow this procedure every time you wear your vest.
