MEASURING INSTRUCTIONS:
Always measure over clothing to be worn in the footwear. All measurements are to be taken while seated, by someone other than yourself. Have your leg crossed over your other knee for circumference measurements 1 through 4. For measurements 5, 6 and 7 place feet flat on the floor. Calf circumference is measured around the largest part of the leg and around the top as illustrated.

*For height on riding boots, take measure #7 on the inside of the leg and add 1 ¾” for wrinkling at ankles. Drop may vary depending on lining. On Patrol Boots add ¾”. Foot tracings are to be taken standing with equal weight on both feet. Draw outlines holding the pencil perpendicular.

NOTE: Orders placed at a Dover store will be shipped to that store.

Specify Size

See fitting instructions and use measurements to determine your size from the chart below.

**FITTING INSTRUCTIONS**

This vest requires measurements of the chest, waist and spine. Remember, the vest is designed to fit snugly. Reference the size chart to select the most appropriate size for your measurements. If your measurements fall between sizes, the best fit is usually the smaller size.

- Chest - Measure at the widest point, to a snug fit. See diagram A.
- Waist - Measure at the natural waist. See diagram A.
- Spine - Measure from the small bump at the back of the neck down to the tailbone, following the contours of the spine. There should be about 1½-2" clearance from the saddle or chair to avoid interference with the saddle while riding. See diagrams B and C.

Waist measurement

Spine measurement

**IMPORTANT:** Due to the snug fit of this vest it is recommended that the side laces be loosened before pulling up the zipper. Doing this ensures the zipper is inserted correctly and prolongs its life. Follow this procedure every time you wear your vest.
