Show Ring Perfection

Made in Italy. Designed for an elegant, profiled fit for ladies and men. Due to the soft leather, these boots are best suited for the show ring, not for everyday use. The semi-custom boot option lets you add or subtract up to an inch from the height and/or calf width on any stock Parlanti boot to achieve your perfect fit.

HOW TO ORDER PARLANTI BOOTS

Use the size chart below to find the closest size available. You can add or subtract 2cm adjustment to height and/or calf.

MEASURING INSTRUCTIONS

Trace each foot on a separate piece of paper. Next, follow the step-by-step directions, below. Measure over the riding apparel you wear—breeches, tights, jeans, socks, etc. Have someone else help you measure, and make sure to indicate right and left foot on each sheet of paper.

Note: to outline correctly, use a slim pen and draw a complete outline of each foot. Trace under the arch of your foot at a 45˚ angle. Trace and label any corns, bunions, etc. Please be sure to add the dotted lines to your tracings, indicating the arch, ball and heel of each foot.

IMPORTANT!
Always have someone else measure you. All feet measurements (1-4) must be taken while standing; all leg measurements (5-8) must be taken in a sitting position. Please note whether measurements were taken over a bare leg or while wearing breeches, tights or pants.

1. TRACING
Wearing socks and breeches normally worn, trace the outline of your feet at a 90˚ angle using a pencil. Then measure from the longer toeline straight to the back of the heel.

RIGHT ______________________________
LEFT ______________________________

2. BALL
Measure the ball of the foot from the big toe joint all the way around the little toe joint, straight across—without angling the measuring tape.

RIGHT ______________________________
LEFT ______________________________

3. INSTEP
Measure from the highest point of the top of the foot all the way around and straight across—not at an angle.

RIGHT ______________________________
LEFT ______________________________

4. HEEL
The heel measurement is taken diagonally from the bottom of the back of the heel and across the top of the foot.

RIGHT ______________________________
LEFT ______________________________

5. ANKLE
Measure around the ankle bone (usually 4” from the floor).

RIGHT ______________________________
LEFT ______________________________

6. CALF
The calf measurement is taken at the widest part of the calf. Tip: it can be found by sliding the measuring tape up and down until finding the widest point.

RIGHT ______________________________
LEFT ______________________________

7. TOP
The top is measured at the highest point (to the crease of the knee). Make a pencil mark on outside of the leg on top of the tape.

RIGHT ______________________________
LEFT ______________________________

8. HEIGHT
The height is measured from the pencil mark, to the floor, on the outside of the leg, then add 1 ½” for your total height measurement (to allow for breakage and wrinkling). From floor up: 6”, 8”, 10”, 12” up leg.

RIGHT ______________________________
LEFT ______________________________

NOTE: Please mark on the foot tracing exactly where heel, instep and joint (ball) measurements were taken.

Foot information for semi-custom boots will be used to determine standard size foot only.

Please provide foam box imprint for all Der-Dau boots.

Incredible fit & fantastic look

Appreciated worldwide, The Dehner Company, Inc. enjoys a long history of exceptional shoe and bootmaking that dates back to 1875, from a little town in Kansas. Their tireless effort has allowed the brand to create a global following—and every boot and shoe is still crafted by hand as was done over a century ago. USA.

MEASURING INSTRUCTIONS
Always measure over clothing to be worn in the footwear. All measurements are to be taken while seated, by someone else. Have your leg crossed over your other knee for circumference measurements 1 through 4. For measurements 5, 6 and 7 place feet flat on the floor. Calf circumference is measured around the largest part of the leg and around the top as illustrated, left.

*For height on riding boots, take measure #7 on the inside of the leg and add 1¼" for wrinkling at ankles. Drop may vary depending on lining. On Patrol Boots add ¾". Foot tracings are to be taken standing with equal weight on both feet. Draw foot outlines holding the pencil perpendicular to the floor.

3. MEASURING INSTRUCTIONS

- Refer to the chart on the right for measurement instructions on where to place
  the tape measure on your legs and feet.
- All measurements should be taken over pants and socks usually worn.
- The customer should stand with weight evenly distributed on both feet.
- Use a thin pen when measuring.
- Note that the feet are rested in the mornings but usually swollen in
  the evenings.
- In the case of boots with long zippers the measurement must be taken from the
  lower and upper ankle points to the ground.

1. FOOT OUTLINE - Please measure both feet and draw the outline of each foot
   with a thin pen. Keep the pen upright and as close as possible to your foot. Please
   mark where measurements of the joint, instep and heel were taken on the foot
   outline. Original foot outline should be sent by mail, not fax, as the fax machine
   may distort the proportions.

2. FOOT LENGTH - Refer to chart.

3. JOINT OF FOOT - Refer to chart.

4. INSTEP - Refer to chart.

5. HEEL - Refer to chart.

6. HEIGHT - Measured on the outside of the leg from the floor up to the middle of
   the knee cap. The leg needs to be slightly bent (see drawing, right). In taking the
   height measurement this way, the dropping of the boots is taken into account.

7. CALF - Please measure around the widest point. For boots that have a long zip
   down to the floor instead of the reinforcement strip we need the following
   measurements. Calf measurements above the floor:
   A - 25 cm, B - 20 cm, C - 15 cm

8. TOP - The measurement is taken just below the knee cap. Breeches must be
   pulled smoothly. Should the calf measurement differ more than 3 cm from the top
   measurement, a short zipper or concealed elastic are recommended. Measurement
   tape needs to be tight when measured over the breech.

9. UPPER ANKLE - Refer to chart.

10. LOWER ANKLE - Refer to chart.

5. CUSTOMER MEASUREMENTS

Tip: Have you compared the shoe size with your tracing? Did you
come up with the same size?

FITTING INSTRUCTIONS
This vest requires measurements of the chest, waist and spine. Remember, the vest is designed to fit snugly. Reference the size chart, below, to select the most appropriate size for your measurements. If your measurements fall between sizes, the best fit is usually the smaller size.

**A CHEST** Measure at the widest point to a snug fit.
**B WAIST** Measure at the natural waist.
**C SPINE** Measure from the small bump at the back of the neck down to the tailbone, following the contours of the spine. Subtract 2” from the saddle or chair to avoid interference with the saddle while riding.

MANUFACTURER RESTRICTED PRICE (MAP)
For years you’ve counted on Dover Saddlery for the best value. We’d love to do even more, but unfortunately, some of our manufacturers restrict the selling price and prevent us from discounting any Manufacturer Restricted Price (MAP) items (previously identified as Premier) in our promotions. MAP items are the result of a manufacturer’s MAP policy, which means that this is the lowest price at which a retailer can advertise the product for sale. United States antitrust statutes permit manufacturers to provide retailers, such as Dover Saddlery, with these pricing restrictions.

We occasionally make our customer list available to carefully selected companies whose products or services may be of interest.
